Bank Integration Error Report — Bank of Baroda FDR

Mock connector failure fixture for FDR-2024-PN-004

DEMO / SIMULATED DOCUMENT — NOT A REAL BANK CERTIFICATE, AICTE ORDER, LEGAL AFFIDAVIT OR VALID FINANCIAL INSTRUMENT.

Connector attempt summary

Field	Value
Instrument reference	FDR-2024-PN-004
Bank fixture	Bank of Baroda
Provider	dummy_bank_api
Attempt number	3
HTTP result	504 Gateway Timeout
Duration	15000 ms
Error code	GATEWAY_TIMEOUT
Simulated flag	TRUE

Interpretation

The upstream core-banking simulator did not respond within the configured timeout. This is an integration/connectivity failure and is not evidence that the FDR is invalid. Queue retry or route for manual verification according to the application's workflow.

Suggested UI outcome: ERROR / RETRY QUEUED — do not mark INVALID based only on timeout.
